Whether you are a seasoned solar installer, an engineer interested in understanding how solar systems are put together, or simply a curious individual wanting to learn more about renewable ...

Larger Solar panels that are designed to be wired together in an array need a standardized termination that can handle higher power levels. The MC4 connector fits the need ...

In this video I show how to make MC4 connectors. MC4 connectors are used for solar panel wiring. Odds are if you build your own system you'll need to make at least a few of your own...

Learn how to assemble MC4 solar connectors in 7 steps with our step-by-step photos and videos. Easily make your own MC4 connectors.

In this post, I will walk you through installing MC4 connectors on your solar cabling. Maybe you're making extension cables like me, or perhaps you're setting up an RV, shed, or other DIY off ...

In this video I will show you how to build your own solar extension wire with MC4connectors.00:00 - 00:17 Intro00:18 MC4 Connectors Anatomy02:31 Selecting th...

Mount your solar panels close together and connect them in series using the existing MC4 cables on the solar panel. Or connect them in parallel using a couple of MC4 "Y" connectors. Here's ...

When you buy any new solar panel (usually over 30 Watts) it will be already fitted with two 500 - 900mm leads with MC4 connectors attached for you to get the power safely out of the solar panel.

In this post I will explain how to make DIY Solar Extension Cables with these MC4 connectors. MC4 connectors are by far the most common connectors used on solar panels. I will ...

How to make photovoltaic panel connectors

Larger Solar panels that are designed to be wired together in an array need a standardized termination that can handle higher power levels. The MC4 ...

To connect our solar panels or arrays of solar panels to a charge controller, we need to know how to crimp PV connectors onto wire to make extensions and that's exactly what we are going to cover ...
