Phase 1 is set to produce G12-68PN, G12+-66P-N, and G10-74P-N n-type bifacial double-glass modules. The second phase is expected to be completed by October 2025. Huansheng ...

With state-of-the-art factories located in China and other strategic regions, TCL Photovoltaic Technology boasts a production capacity of 40 GWp in modules and 25 GWp in solar cells.

As dawn breaks over their automated production lines, Huansheng Solar continues redefining what's possible in photovoltaic manufacturing - one high-efficiency module at a time.

Well, you know, the solar industry's grown exponentially since 2023 - but how do manufacturers like Huansheng Photovoltaic maintain such high standards in an increasingly competitive market?

Since the start of construction, the smart factory project has been completed and put into operation after eight months of effort. Covering an area of 332.5 mu, the factory focuses on the R& D, ...

- CRYSTALLINE SILICON TERRESTRIAL PHOTOVOLTAIC (PV) MODULES (Si wafer based)
Production: NO.20, WENZHUANG ROAD, YIXING ECONOMIC AND TECHNOLOGICAL ...

TCL Huansheng Photovoltaic Panel, relying on the dual-technology platform of "G12+High-efficiency Tiling", leads the development of the industry with differentiated routes, and ranks among BNEF ...

Huansheng Photovoltaic achieves a record 1.1GW cumulative shipments in November, emphasizing high power generation and reliability of its shingled modules. The company's success is ...

On January 14th, Huansheng Photovoltaic, a module making subsidiary of Tianjin Zhonghuan Semiconductor, officially delivered the Shingled Module 3.0 pilot line for mass production. The...
