Huawei has launched its first-ever liquid-cooled 600kW supercharging station. The ultimate solution is jointly developed by Enerji SA, Zebra, and Huawei Digital Energy.

Huawei FusionSolar is proud to introduce the industry's first C& I ESS that uses novel smart air and liquid cooling systems, along with advanced safety, thermal management and power ...

Liquid-cooled power unit is the core part of ultra-fast DC charging system for public charging station and other sites demanding multiple fastchargers. With AC/DC and DC/DC modules decoupled, power ...

Huawei liquid-cooled ultra fast charger solution delivers high-power EV charging with efficient thermal management, reliable performance, and scalable deployment.

Huawei claims this represents a nearly fourfold improvement in replenishment efficiency compared to traditional fast-charging stations. A key technological innovation is the charger's ...

Compared with traditional solutions, Huawei innovatively adopts the liquid cooling technology and DC bus architecture. The product can output a maximum of 720 kW power at full configuration, and ...

This highly efficient Huawei N+1 generation Liquid/Air Intelligent Cooling Energy Storage System (ESS) is designed and built for high efficiency and reliability, with the capacity ...

Based on the ultra-fast integrated charging architecture, Huawei's all-liquid-cooled supercharging infrastructure can support long-term smooth evolution in the future, and at the same ...

With integrated PV and energy storage, Huawei has established a fully liquid-cooled ultra-fast charging architecture that enables synergy between vehicles and chargers and power grids ...

Huawei s fully liquid-cooled energy storage

On April 22, 2025, Huawei officially launched the industry's first fully liquid-cooled megawatt-class supercharging solution at the Smart Electric and Charging Network Strategy Conference, marking ...
