Record-low bids to build battery energy storage systems in India have sparked fears that some projects could be economically unviable and even pose safety risks, industry experts and...

This state-of-the-art energy storage solution is designed to support India's clean energy transition and strengthen the reliability of country's power infrastructure.

Battery Energy Storage Systems (BESS) make it possible to store solar and wind power and use it when it is needed most. With increasing government support and clear targets, India's BESS ...

Driven by ambitious 2030 renewable energy targets (500GW non-fossil capacity) and growing grid stability needs for variable solar/wind, India is rapidly tendering renewable energy (RE) ...

The GEAPP Leadership Council (GLC) today officially announced the launch of India's first utility-scale, standalone BESS project.

India's battery energy storage capacity is set to rise nearly ten-fold to around 5 GWh in 2026 from 507 MWh in 2025, reflecting a shift from tendering to execution of projects.

In this blog, we explore the top 7 biggest battery energy storage projects in India in 2025, highlighting their capacities, technologies, and strategic importance in supporting grid stability and renewable ...

Grid Scale Energy Storage: The Union Budget 2026-27 introduces exemptions on capital goods for lithium-ion battery manufacturing and sodium antimonate for solar glass, aiming to boost ...

Jupiter Electric Mobility (JEM), part of the Jupiter Group, has launched a designed-in-India containerized battery energy storage system (BESS) offering capacities ranging from 241 kWh ...

# India Energy Storage New solar container battery

ET Highlights: India looks at upward revision of renewable capacity target, EU installs record 27 GWh of battery storage capacity Energy Transition Highlights: Our editors and analysts bring ...
