Install the generator set on a concrete pad or base slab able to support its weight and accessories. A proper foundation is needed to resist dynamic loading and reduce transmitted noise and vibration.

Preparation Before Painting / Installation A trial fit is recommended to ensure proper positioning and fit. Check fit of parts before painting as we will not accept the return of modified or painted parts. Wash ...

When attaching WindAways deflector to a curved windshield, simply loosen knobs and bend the windscreen to the windshield's contour. Slip the clamps on the existing windshield and tighten knobs.

In this Instructable I present the steps for the construction of a small Savonius type generator, portable and capable of capturing the energy of the wind to recharge small electronic devices through a USB ...

The Equivalent Pipe Length Method is another way to calculate the required pipe size for a generator installation. The method converts pressure losses inherent in pipe fittings into length of pipe value, which ...

Place the U-Brackets provided over the top of the crossbar and secure to the Wind Deflector through the pre-drilled holes in using (4) 1/4" x 1" hex head bolts, (4) 1/4" flat washers and (4) 1/4" nylocks for ...

Starting at the bottom corner, insert deflector into channel nearest to the mirror. Slowly work your way upward until you are about half way across the top of the door.
