Should I Power my rural property?

Powering your rural property has never offered more options or better economics than today. Whether you choose grid connection, off-grid systems, or hybrid solutions, success depends on matching your choice to your specific situation and lifestyle goals. Start with honest assessment of your power needs and local resources.

How do you manage a solar power plant?

You're managing a personal power plant where every kilowatt-hour matters. Plan for 2-3 days of backup power to get through cloudy periods when solar production drops. Here's where many DIY planners stumble: peak loads. Your morning routine might include starting the coffee maker, microwave, and well pump simultaneously.
