What is a load shedding inverter battery kit?

Load Shedding Units are usually a box with an inverter and battery inside them. They are typically larger in battery capacity than the UPS and range from 1 - 4kW. Built-in kits are larger than the two solutions mentioned previously and consist of an inverter, batteries and a peripheral kit. Why Choose a Load Shedding Inverter Battery Kit?

Should you buy a battery and inverter for load shedding?

Deciding to buy a battery and inverter for load shedding has dramatically improved the quality of life for many families in South Africa because they no longer have the weight of having to prepare for grid failure.

Why do you need a battery bank & inverter for load shedding?

Having a battery bank and inverter for load shedding permanently eases the pressure and frustration that load shedding brings. Inverter battery solutions are an excellent option for future growth and energy independence. Not to mention they are green, sustainable and renewable, making them the perfect way to protect and plan for your future.

Are battery backup kits good for load shedding?

An added bonus of these battery backup kits for load shedding is that you can add a solar array at a later stage to produce your own free electricity. And in doing so, it gives you energy independence from high electricity bills and Eskom's load shedding.

Inverter + Battery Load Shedding Kits (Battery Backup Kit) Load shedding kits, also known as backup power kits, are essential solutions designed to address the challenges posed by ...

Beat Load Shedding with our 5kW Load Shedding Kits. Growatt SPF 5000 ES inverter. 5120Wh Lithium Iron Phosphate battery. Reliable backup power solution.

Inverter battery systems are very much needed in South Africa as we face more and more load shedding. This guide explains what you need to know before buying.

With a 10-year warranty, Load Shredder's battery + inverter bundles offer fantastic throughput and storage capacity, perfect for stage 6 load shedding and above.

Inverter battery shedding kits

1 x 800W Modified Sinewave Inverter 12V 12V 150W Lithium Battery Will run TV, Wi-fi, mobile chargers. Everything is connected directly onto the inverter. When loadshedding happens, it switches over to ...

Load shedding kits consist of a battery and an inverter to convert the battery's DC electricity into AC electricity that your appliances need. The battery capacity limits them, and they ...

Inverter + Battery Guide If you're looking for ways to stay powered during load shedding, you have a few options. In this article, we'll go over the pros and cons of residential load shedding ...

Inverter Battery Load Shedding Kits If you're looking for a reliable load shedding solution to end the always-present grid failure struggle, an inverter battery system is the one for you. The grid failure ...

Beat load shedding with solar backup systems. Inverters, batteries & solar kits for South African homes. Expert installation support.

Sinetech's products will help you to provide power through those difficult load shedding hours and other unplanned power failures. No noise, no petrol/diesel, no fumes. Seamless, instant, 100% automatic ...
