-----

By end-user, utility-scale installations secured 74.62% of Iran's solar energy market share in 2025, while commercial and industrial systems led growth at a 41.12% CAGR.

If you're a government or large enterprise seeking utility-scale solar farms, companies like Iran SolarTech and Tabriz Solar offer extensive project portfolios and robust operational capacity.

Solar output in these areas, which stood at about 23 megawatts last year, has now climbed to 400 megawatts, signaling a significant leap in renewable capacity within the country's ...

Tehran, IRNA - Iran has issued construction permits for about 100,000 megawatts of solar power capacity to encourage private sector investment, a senior official at the country's ...

Iran has set a new record in solar power generation, with output from its solar plants reaching 800 megawatts on August 26, according to the Renewable Energy and Energy Efficiency ...

On Thursday, Iran marked a significant step in its renewable energy journey with the inauguration of the country's largest solar power plant developed by Mobarakeh Steel Group in Isfahan.

At a ceremony attended by senior officials, Iran officially brought 445 megawatts of new solar power into operation while simultaneously launching construction on 177 megawatts of ...

Recently, Jafar Mohammadi Nejad Sijaroudi, Deputy Director of Investment at Iran's Renewable Energy and Energy Efficiency Organization (SATBA), confirmed that the country has ...

Iran has taken a major step toward expanding its clean energy capacity by granting construction permits for nearly 100 gigawatts (GW) of solar power projects, aimed at attracting ...

Constructing 29 solar farms is a monumental undertaking that requires a deep understanding of photovoltaic
