As a leading provider of solar panel installation services in Ireland, Going Solar recognises the importance of utilising all the solar energy produced. With an Eddi energy diverter, ...

Fuel Mix is a graphical representation of energy generation broken down by resource type in Real-Time as well as for the Previous Day and Current Day.

We are running out of fossil fuels quickly, and global warming is increasing rapidly, so we will need alternative power generation. So yes, we do need something like this.

My solar energy project is explained in this video. How I added solar panels to my roof and connected it to a generator to provide 50 miles of electric battery storage daily.

Eddie Microgen Energy Diverter is a solar power diverter that helps you to make the most of your self generated power rather than exporting it back to the grid. Bring an eddi into your home and you can ...

It's a version 2 EDDI, installed last week. It has been showing ok until I fiddled today. The WiFi connection seems to be ok. Background: I had a problem with the EDDI only diverting 500w of ...

The eddi diverts surpluses power from your solar energy system and uses it to heat your water or rooms. This helps you to save energy and minimise your utility bills.

The My Energi Eddi is a "state of the art" energy saving device. It helps you to self-consume the green energy produced by your microgeneration system, and is compatible with all renewable generation ...

Eddie Power Diverter is designed to maximize the use of self-generated solar power, reducing the need to sell excess energy back to the grid.
