This is the first large-scale photovoltaic system in Kosovo that can increase the installed capacity of photovoltaic energy from the current 10.1 MW (2022) to up to 110.1 MW.

The project will be a combination of two components: solar district heating (Termokos) and photovoltaic power (KEK), and with this project, around 70 MW will be added to the heating system of Prishtina, ...

Government-controlled Kosovo Energy Corp. (KEK) said it is preparing to start building its Solar4Kosovo 1 photovoltaic plant near Prishtina. It informed the local community that agricultural ...

The project concerns the development of a 100MWac solar photovoltaic power plant (120 MWp), located between Obilic and Fushe Kosova, in close proximity to Pristina, in Kosovo.

With 278 sunny days, Kosovo is an ideal place to use the sun for energy production. But, current solar energy, together with wind and hydropower output, makes up only 23.3% of the energy ...

Known as Solar4Kosovo, this new solar plant is a key component of the EU's strategy to help Kosovo expand its renewable energy capacity and reduce its reliance on coal power.

As part of the EU's global energy transition initiative, Kosovo is set to host one of the largest solar photovoltaic power plants in the region, supported by combined funding from the European ...

This investment project will install a solar photovoltaic plant of up to 100 MW capacity on former ash dump fields near Kosovo A thermal power plant. This will be the first large-scale solar photovoltaic ...
