Welcome to Laos - Southeast Asia's hydropower heavyweight now diving into new energy storage power sources. With 80% of its electricity exported to neighbors, Laos isn't just playing in the big ...

A 2023 ASEAN Energy Report revealed that Laos could've powered an additional 400,000 homes last year if they'd had proper storage solutions. That's where China's expertise enters the picture.

Acting as a large-scale energy storage system, it provides backup power during periods of high demand and stores energy when renewable sources like solar and wind are not generating electricity.

Welcome to Laos - Southeast Asia's hydropower heavyweight now diving into new energy storage power sources. With 80% of its electricity exported to neighbors, Laos isn't ...

Laos, often called the "Battery of Southeast Asia," is making waves with its latest energy storage power station projects. Nestled between Thailand and Vietnam, this landlocked nation has tapped into its ...

Together with the Government of Laos, EDF signed a memorandum of understanding to undertake the feasibility studies for a Pumped Storage Hydropower project located nearby Nam Theun 2, with an ...

Laos is emerging as a key player in Southeast Asia's renewable energy transition. With abundant hydropower resources and growing demand for grid stability, energy storage solutions are becoming ...

In a determined push to secure energy stability, Laos is intensifying efforts to expand its electricity infrastructure through ambitious hydropower and solar projects.

On 1 September 2025, Electricity du Laos Generation Public Company (EDL-Gen) signed an agreement with private firms from Singapore to develop a pumped-storage hydropower (PSH) project in Sekong ...

Laos new energy storage power station

2026 marks a strategic turning point for Laos in its ambition to become the "Battery of Southeast Asia", with two mega power transmission projects advancing this year. On the first day of January 2026, the ...
