Contrary to what many stakeholders, legislators, and specialists believe, Lebanon does not lack laws regulating the production and distribution of electricity. The country has enough laws ...

In 2021, Lebanon announced a plan to re-route its natural gas imports through Jordan to produce electricity for the Lebanese grid via Syria. However, the implementation of this plan has been...

In 1908, the Soci&#233;t&#233; Ottomane du Gaz de Beyrouth distributed electricity in the city of Beirut, replaced by the Soci&#233;t&#233; d" &#201;lectricit&#233; de Beyrouth in 1923, a company incorporated under French law. Before 1939, the company operated a 4,500 kW diesel power plant and a 6,400 kW

## Lebanon electricity distribution

hydraulic plant. In March 1954, the Lebanese State bought the Beirut Electricity Company, which became the Electricity Office. The Zouk power station went into production in 1956.

Both times, the state failed in its most basic mission: to provide electricity. Unable to unlock the necessary funds to import fuel for EDL, the government let the turbines of power plants fall silent - a ...
