Are lithium-ion batteries the future of electric vehicles?

May 29,2025Lightweight,powerful lithium-ion batteries are crucial for the transition to electric vehicles,and global demand for lithium is set to grow rapidly over the next 25 years. A new analysis looks at ...

Will lithium-ion batteries get cheaper by 2050?

Sodium-ion battery cells already near lithium-ion cost parity, set to get cheaper By 2050, sodium-ion batteries with fast learning rates could deliver storage at 11-14 EUR/MWh - cheaper than lithium-ion at 16-22 EUR/MWh - while also offering higher energy-to-power ratios and high cycle durability, a new research finds.

Lithium battery technology news

A lithium-ion battery cell cost \$568 per kilowatt-hour in 2013, but that cost had fallen to just \$74 per kilowatt-hour by 2025--quite the moving target for cheaper alternatives to chase.

Batteries News is your source of news and market intelligence on the Li-ion batteries industry. Discover trends stay ahead of the curve

From sodium-ion to the EV slowdown, the battery industry saw breakthroughs, setbacks and everything in between in 2025.
