Discover through this story how more than 3,400 people in a remote Micronesia community will gain access to 24-hour power for the first time using renewable energy grids by the ...

A tender is open in Micronesia for the engineering, procurement and construction of hybrid solar minigrid systems at three villages on the Fefen Islands. The closing date for applications ...

Local installer providing off-grid and rooftop solar systems in Micronesia.

The utility on the Federated States of Micronesia (FSM) island of Yap is seeking bids to supply battery energy storage systems (BESS) and 79 kW of solar minigrid generation capacity.

The functioning of the proposed off-grid solar PV-wind hybrid system, augmented with a pumped hydro energy storage system, in an off-grid setting is presented through the following operational cases.

Q: What can you tell us this project and its scope? A: We're in the process of finalizing the scope, but it's safe to say we'll be working to bring renewable power to a number of off-grid ...

The global solar storage container market is experiencing explosive growth, with demand increasing by over 200% in the past two years. Pre-fabricated containerized solutions now account for ...

Total electrical independence starts here. Our off-grid PV kits are the quickest and easiest way to deliver electricity independent from the standard utility grid. Our Helios series is the off-grid ...

An off-grid solar system is a stand-alone power solution that enables you to generate and store electricity without relying on the traditional power grid. This energy independence is particularly ...

New grid-connected solar generation and battery storage systems in Chuuk and Pohnpei will help FSM meet its goal of 70 percent renewable electricity by 2030, while cutting greenhouse gas ...
