Is first solar a US company?

Driven by a passion for innovation and powered by American ingenuity, First Solar has consistently invested in American manufacturing and American jobs. Today, it is the only US-headquartered company among the world's 10 largest module producers. [2024 First Solar](#).

What makes first solar unique?

The company stands alone in the industry with its differentiated semiconductor and streamlined manufacturing process, which yield unparalleled quality and reliability. First Solar's roots run deep in American soil. Born in the Midwest, headquartered in the Southwest, and shipped worldwide, First Solar is an American success story.

What makes first solar a responsible solar company?

First Solar is a responsible solar company because it treats its employees well, manages its environmental impact, and operates its business responsibly. These guiding principles, known as Responsible Solar, produce a technology that reduces risk and maximizes returns while respecting people and the planet.

First Solar proudly established the guiding principles of Responsible Solar - how it treats its employees, manages its environmental impact, and operates its business.
