Where can I buy a solar generator?

Get the EcoFlow solar generator at Amazon (1 solar panel), Lowe's (solar panels sold separately), The Home Depot (solar panels sold separately), or EcoFlow (1 solar panel).

How do I choose the best solar generators?

To pick the best solar generators, we tested some of these power stations for charging capacity, ease of use, weight, and different use cases. Some picks were reviewed by Popular Mechanics test editor Brad Ford, who provided input for the larger-capacity units.

Should you buy a solar generator or a gas generator?

Gas generators still have a place in extreme backup scenarios, but for most households, solar covers the essentials without the fumes or fuss. And if you do need something with more output, especially for larger homes, it's worth looking into the whole house generators that offer robust power and automatic operation.

What makes a good solar generator?

Solar generators need to keep the power coming in and going out. The best solar generators can simultaneously charge all your intended devices via whatever plugs are necessary. Any portable power station worth your money will have a high output capacity so you can charge many devices, even if they require a lot of juice.

I have been using my solar generator unit to run my freezer in the garage and have had no problems. I really like the wind generator, the entire unit is well built and has worked well.
