Will EPA add solar panels to Universal Waste Regulations?

On October 23, 2023, EPA announced a new rulemaking effort to improve the recycling and management of end-of-life solar panels and lithium batteries. EPA is developing a proposed rule to add solar panels to the universal waste regulations and to add tailored universal waste standards for lithium batteries.

Are photovoltaic solar energy systems safe?

The safe and reliable installation of photovoltaic (PV) solar energy systems and their integration with the nation's electric grid requires timely development of the foundational codes and standards governing solar deployment.

Are solar panels regulated at end of life?

Find information here about different types of solar panels and how they are regulated at end of life. If you are disposing of solar panels that are hazardous waste, then regulations under the Resource Conservation and Recovery Act (RCRA) must be followed to make sure the panels are safely recycled or disposed of. On this page:

Are solar panels a hazardous waste under RCRA?

If these metals are present in high enough quantities in the solar panels, solar panel waste could be a hazardous waste under RCRA. Some solar panels are considered hazardous waste, and some are not, even within the same model and manufacturer.

The safe and reliable installation of photovoltaic (PV) solar energy systems and their integration with the nation's electric grid requires timely development of the foundational codes and standards governing ...

The RCRA sets requirements for any entity that generates solar panel waste. The EPA's guidance page on solar panels explains that this includes commercial entities and institutions that ...

Producers, landowners and developers should consider the following natural resource conservation concerns regarding solar farms. Healthy soils are critical for proper function of the water cycle and for ...

Learning from post-disaster assessments and collaboration with industry experts, NLR employees have

# National regulations on photovoltaic panel losses

developed best practices for solar PV in disaster-prone locations. Designing ...

EPA is planning to propose new rules to improve the management and recycling of end-of-life solar panels and lithium batteries.

These requirements and other safety concerns for photovoltaic panels can be found in Chapter 11, Section 11.12 of NFPA 1, as well as in Article 690 of NFPA 70 &#174;, National Electric Code&#174;.

The National Electrical Code (NEC) for photovoltaic systems is covered in Article 690. This article covers a wide range of requirements, including circuit design, wiring methods, grounding, ...

Solar panel installers can ensure compliance with regulations by staying informed about local, state, and federal laws. They should regularly review the National Electric Code (NEC) and any specific ...

When solar panels, which typically have a 25-30 year lifespan, reach the end of their lives and become waste, they must be managed safely. Learn about this renewable energy waste, ...

The U.S. Department of Energy is supporting various efforts to address end-of-life issues related to solar energy technologies, including recovering and recycling materials used to manufacture PV cells and ...
