High-energy lithium-ion systems, quasi-solid-state configurations and sodium-ion batteries were among the main strategies pursued in 2025 to achieve that goal.

The new keyword in JavaScript can be quite confusing when it is first encountered, as people tend to think that JavaScript is not an object-oriented programming language. What is it? What problems ...

Note that if you declared it `var a = new { }; and var o = new object();`, then there is one difference, former is assignable only to another similar anonymous object, while latter being object, it ...

From iron-air batteries to molten salt storage, a new wave of energy storage innovation is unlocking long-duration, low-cost resilience for tomorrow's grid. As the global energy transition ...

This article dives into the invisible forces shaping energy storage systems, from gamma rays to sneaky thermal neutrons, and why engineers are stealing tricks from nature's playbook.

`new String[10]{}; //The line you mentioned above Was wrong because you are defining an array of length 10 ([10]), then defining an array of length 0 ({}), and trying to set them to the same array reference ...`

A new expression is the whole phrase that begins with new. So what do you call just the `"new"` part of it? If it's wrong to call that the new operator, then we should not call `"sizeof"`; the sizeof ...

This comprehensive guide will explore the complete spectrum of renewable energy storage technologies, from established solutions like pumped hydroelectric storage to cutting-edge ...

This review paper explores the impact of space radiation on lithium-ion batteries (LIBs), a critical component in energy storage systems (EESs) for space missions.

But in this review, we summarize recent progress in radiation effects on materials for electrochemical energy

storage systems to show that radiation can have both beneficial and ...

83 new() describes a constructor signature in typescript. What that means is that it describes the shape of the constructor. For instance take {new(): T; }. You are right it is a type. It is the type of a class ...

Global demand for energy storage is surging. Lithium-ion leads today, but new contenders like sodium-ion, flow, and gravity systems are shaping the future grid.
