How much does solar cost in India?

When planning solar for your home in 2025, the first question is always about cost. On average, the solar panel price for homes in India ranges between INR70,000-INR1,20,000 per kW (without subsidy). With the central government's rooftop solar subsidy, this comes down to about INR50,000-INR90,000 per kW, depending on the brand, location, and system type.

Why should you buy solar panels in India?

Solar panels help the environment by cutting down carbon emissions and greenhouse gases. They have a lower environmental impact than traditional energy sources throughout their life cycle.
