They reimagined the traditional refrigerator as a solar-powered box with an internal battery, designed to operate even in the absence of constant power supply. Today, Koolboks ...

SCU provided a 40ft energy storage container to a rural village in the Niger desert in Africa, helping it solve its long-term electricity problem and bringing substantial improvements to the ...

Below is a narrative description of how a solar-powered shipping container is revolutionising the face of access to global energy, off-grid energy, grid backup, and clean ...

Sokofresh's solar-powered cold storage units provide a clean, affordable alternative. These units are equipped with energy-efficient cooling technology that can be deployed in off-grid ...

Solar PV off-grid cold storage systems can assist in mitigating those issues as well as bring sustainable development and economic growth to low-income populations, mainly in rural regions.

Most of us take refrigeration for granted, but the majority of Africans do not have access to this basic technology. Lack of refrigeration means extra expense and is a drag on productivity,...

Instead, developing countries need cold chains that run on renewable energy and use alternative refrigerants with lower climate impacts.

A battery energy storage system (BESS), battery storage power station or battery energy grid storage (BEGS) or battery grid storage is a type of energy storage technology that uses a group of batteries ...

Its 15,000m² plant in Richmond, Cape Town, became the first gigawatt factory on the continent when it began operations in July 2024. The facility can produce up to 3,000 megawatt-hours (MWh) or 3 ...

North African container refrigerator power plant

Smart integration features now allow multiple containers to operate as coordinated virtual power plants, increasing revenue potential by 25% through peak shaving and grid services.
