Battery storage. In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record ...

Meanwhile, BESS installations across the country are projected to rise by 25% this year -- with grid storage installations forecast to hit 13.3 GW -- according to the US Energy Storage ...

The growing integration of renewable energy sources including solar and wind power is driving the demand for energy storage systems in the U.S. to mitigate intermittency and ensure grid stability.

By responding instantly to fluctuations in electricity supply and demand, energy storage balances power generation from all resources and frees up power plants, like natural gas, to serve as baseload ...

Energy storage resources have become an increasingly important component of the energy mix as traditional fossil fuel baseload energy resources transition to renewable energy ...

The following resources provide information on a broad range of storage technologies.

The US Energy Storage Monitor is a quarterly publication of Wood Mackenzie Power & Renewables and the American Clean Power Association (ACP). Each quarter, new industry data is compiled into this ...

About The Us Energy Storage Monitor
The Source of Energy Storage Information and Data For Hundreds of Media Outlets
About Wood Mackenzie Power & Renewables
The quarterly reports from ACP and Wood Mackenzie are routinely cited by hundreds of media outlets as the authoritative source of energy storage industry data. International, national, local, and trade press outlets rely on the data to develop a better picture of where the industry is heading and how energy storage is being integrated into state re...

North American Energy Storage Power

Monitor is a quarterly publication of Wood Mackenzie Power & Renewables and the American Clean Power Association (ACP). Each quarter, new industry data is compiled into this ...

The U.S. has 431 operational battery energy storage projects, 8 using lead-acid, lithium-ion, nickel-based, sodium-based, and flow batteries. 10 These projects totaled 27 GW of rated power in 2024, 8 ...

Texas and California continue to lead the market, with 61% of the total installed capacity in Q4, while the remaining 39% was installed across 13 states, expanding storage deployment ...

US energy storage installations reached new heights with 5.3 GW installed and positive five-year growth projections. Delivered quarterly, the US Energy Storage Monitor from the American ...
