Through manual adjustment or replacement of different roller sets, it enables seamless production of brackets in various specifications on a single solar mounting strut channel production line.

Scope of application: It is used for the operation of sawing and punching all-in-one machine for solar photovoltaic edge pressing block, photovoltaic intermediate pressing block, photovoltaic clamp and ...

The Photovoltaic (PV) Bracket Production Line is a fully automated solution designed for the mass production of solar mounting structures (solar struts/channels).

This equipment is mainly used for punching and manufacturing of photovoltaic brackets (C-shaped steel, U-shaped steel).

These brackets are the backbone of solar panel support systems, providing strength, durability, and adaptability across various installation scenarios. But how are they manufactured at ...

Photovoltaic Bracket Roll Forming line with on-line punching, welcome to visit

The Putai Automatic Solar Panel Mounting Strut Making Machinery provides a perfect synthesis of precision, automation, and versatility needed for high-quality PV bracket production.

With a production speed of 10-15 meters per minute, it ensures fast output while maintaining consistent profile dimensions, smooth edges, and excellent structural strength. The intelligent online punching ...

We provide customers with mature tracking bracket systems, including dual-axis tracking bracket, flat single-axis tracking bracket, inclined single-axis tracking bracket, as well as flexible bracket system, ...

Central to the functionality of the fully automated photovoltaic bracket production line are our powerful three-in-one decoiler straightener feeder machines, seamlessly integrated with a ...
