A Lithium Ion battery cooling system for use in a hybrid vehicle comprises a plurality of self-contained liquid cooling modules, each cooling module including a closed and sealed...

This patent search tool allows you not only to search the PCT database of about 2 million International Applications but also the worldwide patent collections. This search facility features: ...

The invention discloses an immersed liquid-cooled battery energy storage system and a working method thereof, wherein the immersed liquid-cooled battery energy storage system...

In this article, the temperature equalization design of a liquid cooling medium is proposed, and a cooling pipeline of a liquid cooling battery cabinet is analyzed.

The present disclosure relates generally to the field of battery packs and cooling systems for battery packs.

This state-of-the-art energy storage system represents the pinnacle of modern battery engineering. Housed within its robust and sleek cabinet is a sophisticated system designed for optimal ...

[0001] The present invention relates to the field of cabinet heat dissipation technologies, and in particular, to a cabinet liquid cooling system and a cabinet.

The present application relates to a liquid cooling device (100), a battery module, and an energy storage system.

In the battery system, cells are generally combined into battery modules, and air-cooling heat dissipation or liquid-cooling heat dissipation are performed inside the battery module.

A battery system is provided in which the batteries are mounted between a pair of substrates, the system

Patent for battery cabinet liquid cooling system

further including at least one cooling tube mounted next to the batteries, the...
