Established with rich experience and expertise, our factory has been dedicated to providing customers with innovative and customized solutions for their metal forming needs.

We are a professional manufacturer dedicated to cold bending equipment, our engineers can customize different equipment according to the needs of different customers.

Because we insist that every factory should put quality first, we make the machines more automated, more reliable and accurate, and have a longer service life. The equipment can be used for nearly 20 ...

Explore our top - notch solar PV bracket forming machine equipment. Engineered for high efficiency and precision, it can meet all your solar PV bracket production needs.

Photovoltaic bracket cold bending machine This machine is suitable for the cold bending forming production of photovoltaic brackets: ? Maximum forming speed: 30 meters per minute; ? ...

Our company can provide customers with advanced cold bending machines with multiple materials, thicknesses and shapes, and can provide flexible system solutions integrating welding, punching, ...

Through cold bending group by group, the final desired size can be achieved. Combined with electronic control system, hydraulic system, shearing system and counting encoder to realize automated ...

Customized continuous production: The machine can directly produce the required fixed-length brackets according to project demands, reducing on-site cutting and waste, and achieving "production on ...

The fully automatic cold bending forming machine for photovoltaic supports is an advanced piece of equipment. It efficiently cold - bends and shapes metal materials into precise photovoltaic brackets.

Photovoltaic bracket cold bending forming machine factory

Xinhonghua produces cold bending roll forming equipment such as photovoltaic bracket machines, C/Z purlin equipment, roof panel and floor deck forming systems.
