Inverter prices are falling across the board, Woodmac said, driven primarily by Chinese manufacturing competition and technological advances.

April saw nuanced but key price shifts in the European solar market, with module prices rising due to supply constraints, while inverter prices continued to decline. The PV Purchasing ...

Eyeing the rapid market growth, better profits, and high prices across the supply chain in 2022, both existing and new players announced expansion plans one after another, escalating the ...

The inverter market is experiencing "growing pains" as falling prices, shifting demand and technological product changes cause problems for the sector's major Western manufacturers.

Before we present a few solar stocks that you may want to consider for your portfolio, let's take a look at the industry's recent stock-market performance and valuation picture.

Prices have begun to fall after a brief stabilization phase - declining by around 5% to 8% across all technology classes in recent weeks. This drop returns prices to levels seen at the...

As solar module prices continue to fall, pvXchange founder Martin Schachinger explains how price pressure could increase in the weeks and months to come.

Recent U.S. import tariffs on photovoltaic (PV) equipment, including inverters, have not yet precipitated a sharp decline in inverter inventories due to substantial "pre-tariff" stockpiles that remain in the ...

Lawrence Berkeley National Laboratory found that PV-plus-storage system price increases post NEM 3.0 were likely due to rising demand and corresponding equipment and/or labor ...

Photovoltaic inverter stock prices continue to fall

Amid continued declines in panel prices, high inventory levels, and widespread market pessimism, many are still waiting for "even lower" prices. But from our perspective, we may already ...
