A resilient and cost-efficient energy system requires both centralised and decentralised flexibility, making the reactivation of residential and commercial storage a priority. This edition of the ...

Find the most up-to-date statistics about the solar photovoltaic industry in Europe

OSLO/PARIS, June 21 (Reuters) - Europe has clocked a record number of hours of negative power prices this year due to a mismatch between demand and supply as solar power generation soars,...

The Europe solar PV market size crossed USD 63.1 billion in 2024 and is set to register at a CAGR of 7.1% from 2025 to 2034, due to the growing focus on green energy and net zero initiatives.

In the European Union, even though solar PV output broke new records, lower wind and hydropower generation resulted in increased gas- and coal-fired generation year-on-year.

Despite elevated geopolitical tensions and economic uncertainty, this tenth edition of the IEA's World Energy Investment shows that capital flows to the energy sector are set to rise in 2025 to USD 3.3 ...

This shift comes as solar generation reached a record level in Europe in 2025, according to the report, producing more than 340 TWh. This lifted solar's share in the EU power mix to 12.6%, its ...

The EU has long been a front-runner in the roll-out of solar energy. Under the European Green Deal and the REPowerEU plan, solar power is a building block of the EU's transition to cleaner energy. Its ...

Europe's solar sector has maintained its impressive momentum into 2025, with new data confirming record-breaking installation figures across the continent.

The EU solar PV market in 2024-2025 stands at a pivotal moment, influenced by policy-driven growth,
