The Global Solar Atlas (GSA) is a free, online, map-based application that provides information on solar resource and photovoltaic power potential globally. It features the online interactive map tools, simplified photovoltaic (PV) power calculator, reporting tools and the extensive download section. It is intended to provide policy makers, academia, and renewable energy stakeholders to raise awareness in the solar energ...

The Global Solar Atlas, in addition to a series of global, regional and country GIS data layers and poster maps, has been developed to support the scale-up of solar power in countries across the world.

Solar Resource Maps and Data Find and download resource map images and data for North America, the contiguous United States, Canada, Mexico, and Central America. Solar Supply ...

The Global Solar Atlas provide relevant information of solar power potential for energy generation. It is a project administered by the World Bank Group as part of the Energy Sector ...

There are three distinct permitting regimes that apply in developing battery energy storage projects, depending upon the owner, developer, and location of the project. ...

Responding to client's needs, ESMAP and its partners have created a free, web-based tool--the Global Solar Atlas--that can help identify potential sites for solar power generation virtually ...

It is provided by the World Bank Group as a free service to governments, developers and the general public, and allows users to quickly obtain data and carry out a simple electricity output calculation for ...

The project plans to deploy 40 MW of solar photovoltaic (solar PV) and 100 MWh of battery energy storage systems (BESS) at the gold processing facility at the ...

Learn how to map solar potential by region using Atlas. Import solar irradiance data, style it by value,

Photovoltaic project energy storage area planning atlas

compare regions, and share insights with your team--all from your browser, no GIS tools needed.

The USPVDB Viewer lets you discover, visualize, and interact with the USPVDB through a dynamic web mapping application.
