---

Hyperion's first battery storage projects in Portugal, located in Estremoz and Évora. Co-located with solar PV plants, enabling energy to be stored during peak production hours.

The Portuguese government plans to invest up to 400 million euros (\$466 million) to improve grid management and boost battery storage following a massive blackout across Spain and ...

Portugal is firmly committed to achieving carbon neutrality by 2050. A cornerstone of this strategy is the integration of Battery Energy Storage Systems (BESS) to support its rapidly ...

Portugal's Greenvolt will spend EUR60M on Europe's largest battery storage hub, boosting EU grid stability, adding skilled jobs at home and lowering energy bills.

Hyperion Renewables, in partnership with Omexom Portugal and advanced battery manufacturer Saft, has begun construction of Portugal's first utility-scale battery energy storage ...

Portugal will launch a competitive tender for 750 MVA of battery energy storage before January 2026, as part of a broader EUR400 million package aimed at improving grid reliability and ...

Portuguese energy firm Galp and Powin, a US-based energy storage integrator, completed the commissioning and injected the first electrons of stored energy to the grid from a utility ...

Battery storage is now essential to ensure flexibility and resilience to electrical systems, supporting the growing incorporation of renewable energies. More than a technical statement, it is a ...

Portugal will invest \$480 M (EUR400 M) to strengthen grid stability and scale battery storage, aiming for 750 MW of BESS capacity after Iberian blackout.

# Portugal Energy Storage New Energy Storage Battery

Portugal's energy-storage market is entering a new stage of maturity, combining grid-scale standalone batteries and hybrid (co-located) systems with renewable plants.
