In Yamoussoukro, they decided to tackle these issues from the roots by developing planning documents, by planning very large roads (50 m) and by creating several green spaces with artificial lakes.

When a local chocolatier needed reliable power for refrigeration, Yamoussoukro's thermal phase-change materials came to the rescue. Now their cocoa butter stays solid without diesel ...

The city of Yamoussoukro has several abandoned green spaces that have been gradually nibbled away by city dwellers. The aim of the study carried out in this city was to evaluate the diversity of plant ...

In Yamoussoukro, there is a concerted effort to promote public transportation as a means to reduce traffic congestion and lower carbon emissions. The city is exploring the expansion of its ...

In a new era of low-carbon life, energy conservation and emission reduction are more exciting! Henan Jingtong Rubber Roll Co., Ltd's environmental protection work has a long way to go.

We thank the organisers of the Summit of Yamoussoukro and ask them to draw the outlines of a permanent information and consultation platform on climate for African Cities and Regions, facilitating ...

Projects that reduce or remove emissions, like planting trees, switching to clean cookstoves or building solar mini-grids, can earn carbon credits. These credits are then sold to ...

These five cities, Abengourou, Ferkessedougou, Man, San Pedro and Yamoussoukro, are developing Sustainable Energy and Climate Action Plans, so that they can better anticipate the ill ...

This study assessed the floristic diversity and carbon storage capacity of four major urban green spaces in Yamoussoukro using 26 plots of 400 m²; and allometric equations for biomass ...

Reduced carbon emissions yamoussoukro

Yamoussoukro has a hot tropical climate with a winter dry season. The city experiences a wet season from April to October and a dry season from November to March.
