The online Solar Panel Installer Training Course offered through SDSU Global Campus is a comprehensive program designed to help you start a successful career in the photovoltaic solar (PV) ...

The program provides comprehensive knowledge and practical applications of photovoltaic (solar electric) system operations, including installation, design, financing and business aspects of ...

Our online campus delivers expert-led training that fits your schedule - whether you're starting fresh, advancing your career, or adding solar skills to your trade.

Solar design and installation training prepares workers to properly design, install, and maintain these solar energy assets.

This workshop uses a blended-learning approach that combines onsite hands-on training with online live lectures both before and after the hands-on day in our solar lab in Austin Texas.

Register to our 2-DAY SOLAR PV INSTALLATION TRAINING Learn how to setup ON-GRID, OFF-GRID and HYBRID PV systems. Trained on the job and gain expertise with experience. In this ...

Take a deep dive into National Electrical Code (NEC® 2020) standards as well as other best practices that pertain to designing safe and efficient grid-direct PV systems.

Otherwise, please register with us using the registration link to access any of the FREE courses. Once you are registered, simply click the icon below to access the class.

The Solar PV Installation and Design Training Program is designed to provide participants with

Registration for practical training on photovoltaic panel parameter determination

comprehensive knowledge and practical skills essential for a successful career in the photovoltaic ...

The Solar Instructor Training Network developed a robust local training network across the United States. During its term, the program partnered with more than 400 community colleges, labor training ...
