Saft batteries contribute to a low carbon economy through their ability to store electricity efficiently. In addition to this contribution, we have 5 goals to reduce our impact through our Program Net Zero.

Saft has been manufacturing batteries for more than a century and is a pioneer in lithium-ion technology with over 10 years of field experience in grid-connected energy storage systems.

Saft, a subsidiary of TotalEnergies, has unveiled it will boost the energy density of its lithium battery energy storage system from 3.3 to 5 MWh in 2026, and the company will use a new AI ...

For more than a decade, Saft has been providing complete storage solutions up to hundreds of MWs that integrate a Saft lithium-ion battery system with power-conversion devices as well as power ...

Saft, a subsidiary of TotalEnergies, has extended its energy storage system (ESS) offering with the launch of its latest innovation: the Intensium Flex (I-Flex) battery storage container.

The scalability and flexibility of Saft's Intensium Max energy storage solutions optimize renewable energy projects. They adapt to varying energy demands, especially in large PV solar and ...

French battery maker Saft says it has started the production of its I-Shift grid-scale battery energy storage systems from its Jacksonville factory in the state of Florida. The company ...

Saft, a subsidiary of TotalEnergies, has developed a new high-energy density storage system (ESS) optimized for time-shifting applications: a key enabler for the massive integration of...

Saft, a subsidiary of TotalEnergies, has extended its energy storage system offering with the launch of its latest innovation: the Intensium Flex (I-Flex) battery storage container.
