"I would like to thank our partners in Senegal, especially Senelec, for their unwavering support since our first investments in 2015. The on-time commissioning of Walo Storage ...

Renewable energy investments in Senegal primarily focus on solar, wind, and biomass energy projects. The Senegalese government has set ambitious targets to increase the share of ...

Senegal has officially inaugurated the "Walo Storage" plant in Bokhol (Saint-Louis Region) on January 22, 2026. This marks a technological milestone as West Africa's first large-scale ...

With the Launch of Walo Storage, a New Era Begins for Senegal's Energy Sector in West Africa to be coupled with battery energy storage dedicated to frequenc

Strategic global collaboration is fast-tracking Senegal's energy transformation, with key projects unlocking financing, infrastructure and technology across renewables, LNG and storage.

Senegal has significant solar resources and large wind potential. The costs of renewable energy generation are generally lower with stronger solar radiation and stronger wind speeds.

Senegal's solar boom is real, but it runs on private momentum as public ambition outpaces the state's financial capacity. Households and industries drive solar growth to secure ...

Senegal has set ambitious goals to reach 2.5 GW of installed capacity by 2030. With projects like Niakhar, the country is on a viable path toward meeting that target sustainably and ...

Senegal's progress shows that African countries can simultaneously expand energy access and successfully pursue low-carbon development. With the right mix of political commitment, ...

# Senegal Wind Solar and Storage Community

Senegal has reached an 84% electrification rate, with 294 MW of residential PV installed, while several large-scale solar-plus-storage projects are under development, despite the start of ...
