SL1500 series wind turbine adopts mature and reliable double-fed power generation technology with rotor diameter 70/77/82/90/93m and hub height 65/70/80/100m which can meet requirements of ...

Sinovel's primary focus is on the development and production of wind turbines, which are used to generate electricity from wind power. The company's turbines range in size from small-scale models ...

Read news & in-depth analysis of Sinovel's wind power business, contracts and deals on Windpower Monthly

Abstract: A segmented wind rotor blade for a wind turbine generator system and the assembling method thereof are disclosed. The segmented wind rotor blade includes a blade root section adjacent to a ...

Sinovel is the first in China to have introduced international advanced MW-level wind turbine technologies and developed the 1.5MW series of wind turbines adaptable to a variety of wind ...

The invention provides a power control method and a power control system for a wind generating set.

Sinovel Wind Power is a company that primarily provides 1.5 megawatt (MW) series land wind electric power generator sets and 3 MW marine wind electric power generator sets.

This paper introduces a new way to plan and manage the use of wind and solar power, along with traditional thermal power (TP) and batteries, to get the most ...

Wind conditions are more stable than onshore, there is no need to build on expensive land, and the distances to the loads are shorter and less expensive to cover.
