Slovenia has launched a new public call, making a total of EUR60 million available for new investments in solar power plants and electricity storage. Eligible beneficiaries are legal persons, ...

Slovenia has secured 11.9 million euros in EU funding to boost community self-supply of electricity from renewable sources between 2025-2027. The funds will support photovoltaic systems ...

By co-financing these investments, the public tender encourages an increase in the production of electricity from renewable energy sources in Slovenia. The public call is implemented ...

Solar and wind power projects with or without energy storage that are on Slovenia's priority list can be submitted for grants from the European Union's Modernisation Fund. The round is ...

Slovenia has set aside EUR16 million (\$16.7 million) to support solar energy communities, requiring projects to include at least 100 kW of PV capacity, with or without storage. The program will run until 2027.

The investments are aimed at increasing the share of electricity from renewable energy sources, reducing losses in the electricity grid and promoting energy efficiency measures in industry.

Slovenia will promote and encourage the use of renewable energy through appropriate incentive legal measures, known as positive legal discrimination, which will reduce import ...

Slovenia's solar success story shows that smart engineering can overcome geographical limitations. As panel costs drop 8% annually and efficiencies rise, expect more nations to follow this alpine model.

The Energy Agency of Slovenia approved the applications for subsidies for 36 photovoltaic plants in the latest public call for state support. The highest offered price among the picked projects ...

Slovenia s Ultra-High-Efficiency Procurement of Photovoltaic Containers

New EU solar regulations are here. Understand the Ecodesign and Energy Labelling rules and see how manufacturing in Slovenia streamlines compliance and market access.
