We compare projected sodium-ion and lithium-ion price trends across over 6,000 scenarios while varying Na-ion technology development roadmaps, supply chain scenarios, market ...

CATL has introduced sodium-ion batteries with a potential cost reduction to \$10/kWh, using sodium's abundance and safety to address energy storage challenges. Sodium-ion batteries are...

CATL's new Naxtra sodium-ion "salt" EV battery costs just \$10-\$19/kWh - about one-tenth of current lithium-ion prices (~\$100-\$115/kWh). It retains 85% capacity after 3.6M miles, ...

Sodium-ion batteries (SIBs) could offer a promising cost-reduction alternative to lithium-ion batteries (LIBs), according to a report from the International Renewable Energy Agency (IRENA).

The present work applies a bottom-up cost model for determining expected future price trends between lithium-ion (LIB) and sodium-ion batteries (SIB) and incorporates both storage technologies into a ...

By 2050, sodium-ion batteries with fast learning rates could deliver storage at \$12.76 - \$16.24/MWh - cheaper than lithium-ion at \$18.56 - \$25.52/MWh - while also offering higher energy ...

For a compact, the switch to a Sodium-Ion battery could reduce the final sticker price by an estimated \$1,600, at the cost of a 15-20% reduction in range. This is the engineering trade-off at ...

CATL's announced sodium-ion battery pricing of \$19 per kilowatt hour represents a 65% reduction from current lithium iron phosphate costs of \$55-\$70/kWh, not the 90% cost decline ...

According to CATL, the mass production cost of sodium batteries has already dropped to RMB 0.55/Wh, underscoring their competitiveness. Driven by cost advantages and policy support, ...

Sodium-ion's road ahead Sodium-ion batteries face a cautious path to wider adoption. Currently under 1% of

Sodium-ion battery cost

the global battery market, their cost advantage over LFP has diminished, with ...
