What is a solar generator?

A solar generator captures and stores solar energy in a portable power station using solar panels. EcoFlow solar generators feature high-efficiency panels, flexible power outputs (300-7200W), and durable, portable designs built to last.

Does a solar generator have a DC outlet?

For DC, a 12V car port is standard though some solar generators also have two 5.5mm DC outlets for smaller electronics and a 12V/30A RV outlet. For devices, check that the solar generator has at least 4 USB ports. Most people/families have multiple devices like a camera, several smartphones, a tablet and so on.

Which solar generator should I buy?

You have more appliances to power and they are probably bigger as well. We recommend the Jackery Explorer 3000 Pro. It's the newest solar generator from Jackery and offers plenty of power for RVs, motorhomes and boats. Powerful portable solar generator - great for powering multiple appliances. Large capacity. Fast solar & AC recharging.

How much power does a solar generator have?

If you want a solar generator that can power most household appliances, make sure it has a capacity of at least 2000Wh (2kWh). If you want to power multiple large appliances or part of your home for an extended period like a few days, get an expandable solar generator. This lets you add more batteries to increase the solar generator capacity.
