Are solar panels a scam?

Solar panels themselves are not a scam. When the sun shines on solar panels, they produce electricity that can be used to power appliances and devices in your home. Making your own solar energy this way saves you money on your utility bills. That's not to say solar panel scams aren't real--just that the technology itself is not the problem.

How do I avoid getting scammed with solar panels?

To avoid getting scammed, you need to know what to look out for and when to walk away. Here's our guide to spotting solar panel scams and finding a great installer. If something you see or hear from a salesperson sounds too good to be true, it probably is.

What are the most common solar scams?

One of the most prevalent solar scams involves misleading lease agreements or power purchase agreements (PPAs). While these financing options are legitimate ways to access solar energy, unethical companies may misrepresent the terms or benefits of these agreements.

How do you know if a solar company is legit?

Check the company's reviews on the Better Business Bureau website and verify that installers are certified by the North American Board of Certified Energy Practitioners (NABCEP). Also, research the company's online presence and ask for detailed quotes and contract information. Are offers for "free solar panels" legitimate?
