Chinese-manufactured solar photovoltaic (PV) panels are piling up in European warehouses, with approximately 40 GW of capacity currently in storage - the same amount installed across the whole ...

Officials issued a notice on Wednesday that warned against market monopolies, saying supply and demand mismatches, plus severe price fluctuations and hoarding were harming the ...

According to a market impact analysis by the Solar Energy Industries Association (SEIA), tariffs on imported solar cells and modules have led to the loss of more than 62,000 U.S. jobs and ...

A recent report by business intelligence firm Rystad Energy reveals that Chinese-manufactured solar photovoltaic panels are piling up in European warehouses, with approximately 40...

Clean Energy Associates (CEA) is receiving more calls from solar developers concerned about warehouse panel damage. CEA senior engineering manager Claire Kearns-McCoy explains ...

The Chinese government has actually released a notification to its PV industry that asks for the optimization of the market as well as further buildout of its framework while warning versus hoarding ...

A recent report by business intelligence firm Rystad Energy reveals that Chinese-manufactured solar photovoltaic panels are piling up in European warehouses, with approximately 40 ...

Stockpiling Chinese solar panels is one way to plug the shortfall in Europe's own manufacturing capacities. But the flood of cheap Chinese imports could threaten European manufacturers.

And, it turns out, Europe was also hoarding mountains of another commodity: solar panels. Some EUR7bn worth of solar panels -- or 40 gigawatts direct current (GWdc) of capacity -- are...
