Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

Plug-and-play balcony solar systems are small-scale solar setups (300-800W) for apartments and homes. They include solar panels, microinverters, mounting hardware, and plug-in ...

Modern Courtyard Solar Power Generation Equipment: The Future of Outdoor Energy Let's face it - courtyards aren't just about rose bushes and stone fountains anymore.

It integrates advanced photovoltaic modules, inverters, and electrical cabinets into a compact and functional unit. Ideal for remote areas, emergency power supply, and various off-grid applications, ...

Mobile solar containers enable total off-grid operation, providing power in locations with no utility grid or where grid access is unreliable. This is essential for rural development projects, ...

SolarBox is built to solve project power needs. The system is modular and easily scalable: you can add multiple units to increase output, and it supports on-grid, off-grid, and hybrid configurations.

This is a detailed walk-through of the planning and installation of our 3kW - 5kWH - 120V off-grid solar system that powers a rehabbed shipping container.

This is the product of combining collapsible solar panels with a reinforced shipping container to provide a mobile solar power system for off-grid or remote locations.

This setup lets you bring solar power anywhere you need it. You can use a solar energy container at faraway work sites, outdoor events, or for mobile businesses.

Solar container outdoor power in the courtyard

Although more extensive solar panel installations may be challenging in small spaces, advancements in modular solar technology allow users to create energy-harvesting setups tailored to ...
