-----

These retail prices were collected in June 2025 and include the cost of power, distribution and transmission, and all taxes and fees. Compare Uruguay with 150 other countries.

Explore Uruguay solar panel manufacturing landscape through detailed market analysis, production statistics, and industry insights. Comprehensive data on capacity, costs, and growth.

Uruguay did what most nations still call impossible: it built a power grid that runs almost entirely on renewables--at half the cost of fossil fuels. The physicist who led that transformation says...

Uruguay receives an average 1,700 KW per square meter of sunlight a year, on par with Mediterranean countries although solar represents only a fraction of the country's total electricity ...

The average electricity price in Uruguay has decreased from \$5.00/MWh in 2023 to \$4.93/MWh in 2024. Since 2019, the average electricity price in Uruguay has fluctuated between \$3.67/MWh in 2021 and ...

Historically, the average for Uruguay from 1980 to 2023 is 0.07 billion kilowatthours. The minimum value, 0 billion kilowatthours, was reached in 1980 while the maximum of 0.5 billion kilowatthours was ...

6Wresearch actively monitors the Uruguay Solar Energy Market and publishes its comprehensive annual report, highlighting emerging trends, growth drivers, revenue analysis, and forecast outlook. ...

Held up as a case study for successfully transitioning away from fossil fuels, Uruguay now generates up to 98% of its electricity from renewable energy.

A 2019 report by the International Renewable Energy Agency described Uruguay's geographical and temporal characteristics as making solar and wind highly complementary: solar power generation ...

With an electricity mix fed by approximately 94% renewable sources, Uruguay is already a decarbonisation

# Solar energy prices in Uruguay

pioneer. But while 46% of those sources are hydropower, 27% comes from the wind ...
