We produce sheet metal parts for distribution boxes/cabinets, battery box, solar support, frames etc in solar energy industry for many years and have won the praise from customers around the world.

A new and growing market for our fabricated metal parts is the burgeoning alternative energy industry. Supporting global powerhouses in the solar industry located in our community has given us an ...

In summary, we are your one-stop shop for all your custom stamping and sheet metal processing needs. Whether you require stainless steel enclosures, aluminium alloy shells, or any other precision sheet ...

This allows us to manufacture custom energy equipment sheet metal parts with outstanding quality. Our team of highly trained professionals has the expertise to customize energy sheet metal parts to your ...

We manufacture a wide range of components for PV inverters, including aluminum die-cast housings, heat sinks, mounting brackets, internal structural parts, and custom machined components.

Metaltech provides precision sheet metal fabrication for solar, wind & renewable energy solutions. Laser cutting, welding & coating services.

Transitioning from AL die casting to aluminium sheet metal for solar inverter housing presents numerous advantages, including cost efficiency, enhanced manufacturing flexibility, ...

Solis is one of the world's largest and most experienced manufacturers of solar inverters supplying products globally for multinational utility companies, commercial & industrial rooftop ...

In an industry where every component must be built to last, Approved Sheet Metal has proven itself as a trusted partner for custom metal fabrication. Our deep experience with precision ...

Solar inverter sheet metal processing manufacturer

With advanced technical equipment, rigorous quality management system and professional technical team, we are committed to providing customers with one-stop metal manufacturing solutions from ...
