California leads as the top solar state. With over 54 GW of solar installed, enough energy to power over 15 million homes. Texas has the fastest growing solar economy with the largest utility-scale solar and ...

Discover the best states for solar power production in the country with our February Solar Energy Generation Report. Where does your state rank?

How Is Solar Energy Measured? Why Is Solar Becoming More Popular? How Do Solar Panels Work? The cost of residential solar panels has fallen by 40% in the last decade, according to the Solar Energy Industries Association. Decreasing prices combined with federal and state incentives have led to an increase in the popularity of home solar panels. Federal, state, and local governments have also set varying renewable energy goals, encouraging ... See more on chooseenergy Electricity Markets and Policy Group Capacity and Generation by State | Energy Markets Distributed Renewable Energy & Storage. Efficiency & Load Flexibility. Energy Affordability. Energy Planning & Procurement. Reliability & Resilience. Utility ...

Chart: Which US states generate the most solar and wind energy? A new report tracks how renewable energy is transforming the nation's electricity mix, state by state.

California has by far the greatest installed capacity of solar photovoltaic (PV) power of any U.S.

We expect this trend will continue in 2025, with 32.5 GW of new utility-scale solar capacity to be added. Texas (11.6 GW) and California (2.9 GW) will account for almost half of the ...

This report summarizes the latest statistics on solar power capacity by state and highlights the top U.S. states in solar power generation.

Solar energy progress by state including capacity, infrastructure, and economic statistics.

Solar photovoltaic power generation in the state

Distributed Renewable Energy & Storage. Efficiency & Load Flexibility. Energy Affordability. Energy Planning & Procurement. Reliability & Resilience. Utility Regulation & Business Models. Utility-Scale ...

The State of Renewable Energy data dashboard tracks capacity and generation totals for each state from 2015 through 2024. It tracks progress on solar, wind, battery energy storage, and EV ...

Discover which U.S. state generates the most solar power and how solar capacity varies nationwide.
