A structure for installing a solar power generation panel on the roof of a building includes a top surface, a side surface surrounding the top surface, extending downward from the top surface, and having a ...

Given the importance of patents to protect solar IP, the rapid growth of the solar industry, and the complexity of the current patent landscape, we strongly recommend partnering with an ...

JP 2021-145496 A shows a photovoltaic open-area installation (also called a solar park). In this, the solar surfaces are naturally arranged exclusively horizontally offset in the open area. It is ...

There is also provided a method of installing a floating photovoltaic power plant. [0001] The present invention relates to renewable en-ergy production, and more specifically to apparatus re-lating to ...

The design negates extensive land leveling, offering a cost-effective, typhoon-resistant structure that minimizes the need for terrain modification, streamlining the installation of large-scale ...

The present invention is directed to a solar-powered generator that captures solar energy. This solar-powered generator allows the sun's radiation and light to enter an inner chamber...

Search specific patents by importing a CSV or list of patent publication or application numbers. A solar panel arrangement for capturing solar energy and supplying power for use in a...

Patsnap Eureka AI that helps you search prior art, draft patents, and assess FTO risks, powered by patent and scientific literature data. Photovoltaic (PV) power generation is widely used in human life ...

Abstract A structure for installing a solar power generation panel on the roof of a building includes a top surface, a side surface surrounding the top surface, extending downward from the...

Solar power generation installation patent

The invention relates to the technical field of photovoltaic power generation, in particular to a distributed photovoltaic power generation structure which comprises a plurality of solar cell panels, rotating ...
