-----

In the third quarter of 2025, solar projects representing about 20% of planned capacity reported a delay, a decrease from 25% in the same period in 2024, based on data compiled from ...

The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic (PV) and solar thermal facilities, as well as country-aggregated distributed (&lt;1 ...

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

Solar deployment and electric vehicle (EV) sales broke records in 2023 and 2024. Renewables now dominate new power generation capacity, while new domestic clean energy ...

EIA projects that PV's growth in 2023 (27 GWac) and 2024 (36 GWac) will continue in 2025 (39 GWac) and remain at similar levels in 2026 (36 GWac). In 2024, 24 states and territories ...

Track interconnection queue requests across US ISOs and utilities, with daily data updates. Learn what types of projects are being proposed, where, and how long they take to get approved.

The present review study, through a detailed and systematic literature survey, summarizes the world solar energy status along with the published solar energy potential assessment articles for ...

About 20 percent of planned solar capacity reported a delay, down from 25 percent in the same period in 2024. Solar remains the country's fastest-growing source of new generating capacity,...

Each month, we track projects in development and update our list of the largest planned solar projects expected to come online in the US. As of February 2026, there are 4,155 planned solar projects in ...
