Should you buy a power station or solar generator for home backup?

One of the most common reasons people purchase a power station or solar generator for home backup is to ensure everything in their refrigerator stays cool. However, refrigerators have unique power needs compared to other electronics, so it's essential you double-check your unit's requirements before making a final purchase.

What is the best solar generator for home backup in 2025?

1. Best Overall Option: Jackery HomePower 3000
Key Details: If you're looking for the most well-rounded solar generator for home backup in 2025, the Jackery HomePower 3000 stands out as our top pick. It delivers a robust 3,600W of continuous power (with a 7,200W surge), backed by a durable 3,072Wh LiFePO4 battery that's rated for 4,000+ cycles.

Do you need a solar generator for home backup?

With climate disasters on the rise, the need for a solar generator for home backup is more acute than ever. But, for most of us, this is new territory and it can be difficult to unpack what your power needs are and how much budget you need to build an effective emergency setup.

Are solar generators a good source of backup power?

Solar generators are a dependable source of backup power, but getting the most out of them requires a little planning. Whether you're preparing for weather-related outages or grid instability, following a few smart practices can make a big difference in how long your power lasts.

In the last five years or so, portable fuel-powered generators and battery-based power stations have become increasingly essential in extreme weather. But power stations (i.e., solar ...
