Japan was once the world's leader in solar panel manufacturing, but its share has fallen to below 1% because of the subsidized competition from Chinese manufacturers. However, Japan can claim that ...

Calls for Japan to prioritize renewable energy sources like wind and solar are increasing as the government reviews its energy plans. However, China's dominance of key components and ...

Kyocera, a leading Japanese technology innovator, will spearhead the development of this massive floating solar farm situated in Yamakura Reservoir, located in Japan's Chiba region. The ...

In May 2021, the Japanese Trade Ministry said that Japan may require up to 370 GW of solar capacity by 2050 to reach the goal of cutting carbon emissions to zero.

Japan has launched an investigation into Chinese-made solar panels over fears they may contain hidden communication devices capable of disrupting the nation's power grid - a security ...

OverviewGovernment actionSolar manufacturing industrySee alsoExternal linksThe Japanese government is seeking to expand solar power by enacting subsidies and a feed-in tariff (FIT). In December 2008, the Ministry of Economy, Trade and Industry announced a goal of 70% of new homes having solar power installed, and would be spending \$145 million in the first quarter of 2009 to encourage home solar power. The government enacted a feed-in tariff in November 2009 that requires utilities to purchase excess solar power sent to the grid by homes and businesses and pay twice the st...

Japan is betting \$1.5bn on a breakthrough in next-generation ultra-thin, light and bendy solar panels, subsidising the commercialisation of a ...

China's solar generating capacity is expected to surpass coal for the first time this year, according to the country's top electricity industry group, marking a milestone in the country's ...

Solar power station in China in Japan

Space-based solar power offers a compelling alternative--one that doesn't rely on land availability and can continue operating even during emergencies. This forward-thinking approach ...

Shanghai Electric Power, headquartered in China, has acquired a mega-solar project in Iwakuni, Yamaguchi Prefecture. Its rush to complete the project by 2024 has stirred unrest in the ...

Japan is betting \$1.5bn on a breakthrough in next-generation ultra-thin, light and bendy solar panels, subsidising the commercialisation of a technology that analysts say could disrupt...

Production of solar panels, electric vehicles and batteries have all benefited from state support, while Chinese companies, including state-owned enterprises, have become the main ...
