Solar drilling, a groundbreaking technology that harnesses the power of the sun to drive drilling operations, is emerging as a promising solution to address the energy needs of the 21st ...

Our containerised off-grid solar solutions are fully customizable, and our team of experts provides end-to-end support, from site assessment to installation and maintenance.

New case studies highlight how artificial intelligence, advanced hardware, and innovative business models are enabling success in drilling automation.

The solar rail system consists of individual segments that are used during construction connected to the fixed, centrally arranged container floor. These can be laid quickly, regardless of the floor class and ...

Our containerized energy solution offers notable economic and practical advantages: Minimal civil and site work costs, with system setup requiring only open flat ground and no ground penetration

An Off Grid solar Container unit can be used in a host of applications including agriculture, mining, tourism, remote islands, widespread lighting, telecoms and rural medical centres.

MOBIPower hybrid clean power containers combine battery energy storage systems with off-grid solar containers for remote industrial sites in Canada & USA.

This paper presents the design, deployment, and performance evaluation of a mobile solar-diesel hybrid energy system deployed by an onshore oil and gas Operator in the United Arab ...

What is an SWMC Drilling Rig? SWMC drilling rigs are highly efficient and versatile machines designed for drilling in tough environments. In photovoltaic engineering, they are essential ...

Solar-powered automated containerized drilling site

With intelligent sensor fusion, AI-powered vision systems, real-time production data, and edge computing, the most advanced construction autonomy is now available for piling on solar farms.
