Singapore has surpassed its 2025 energy storage deployment target three years early, with the official opening of the biggest battery storage project in Southeast Asia.

The Bulan Solar PV and battery energy storage system (BESS) is a landmark cross-border renewable energy initiative, delivering clean electricity from Indonesia to Singapore. It's set to become one of ...

Energy storage scale-up, offshore wind auctions, and shifting power roadmaps emerge as key Asia-Pacific transition themes, BNEF says.

Leading the way for the region, Singapore launched the largest energy storage project in Southeast Asia in 2024. Coordinated by the Singapore Energy Board and invested and constructed ...

Search all the announced and upcoming battery energy storage system (BESS) projects, bids, RFPs, ICBs, tenders, government contracts, and awards in Southeast Asia (SEA) Region with our ...

Singapore could sit at the "core" of new regional electricity grids in Southeast Asia, according to research from Rystad Energy.

Four original case studies of solar power inverter systems with lithium batteries deployed in Southeast Asia--design choices, performance insights, and how storage cuts diesel and grid costs.

Southeast Asia can look to Australia and Japan as examples of how to promote the adoption of energy storage systems (and, once the necessary regulations are in place, the potential speed of the rollout).

Contemporary Amperex Technology Co., Ltd. (CATL), a global leader in innovative new energy technologies, has officially signed an agreement to supply a 2.2 GWh battery energy storage system ...

# Southeast Asia New Energy Storage Project

This briefing "Energy Transition in Southeast Asia: Solving the Storage Problem" by Clifford Chance examines the regulatory frameworks currently in place in Southeast Asia, what more ...
