This document is meant to be used as a customizable template for federal government agencies seeking to procure lithium-ion battery energy storage systems (BESS).

The system shall include an integrated battery management system (BMS) which monitors the condition of the battery system and capable of sending signals to an integrated microgrid controller to ensure ...

While various technologies, such as flywheels, fuel cells, compressed gas, and others, are either in use or development, the primary focus of most of the jurisdictional Authority Having Jurisdiction (AHJ) is ...

As this report will detail, there are many codes and standards that affect the construction, installation, and usage of energy storage technologies. The remainder of this section will briefly discuss the ...

The U.S. Department of Energy (DOE) Energy Storage Handbook (ESHB) is for readers interested in the fundamental concepts and applications of grid-level energy storage systems (ESSs).

The clean energy industry, represented by the American Clean Power Association (ACP), encourages state and local jurisdictions to incorporate or adopt National Fire Protection Association (NFPA) 855, ...

The Department of Energy Office of Electricity Delivery and Energy Reliability Energy Storage Program would like to acknowledge the external advisory board that contributed to the topic identification, ...

This article summarizes key codes and standards (C& S) that apply to grid energy storage systems. The article also gives several examples of industry efforts to update or create new ...

An overview of Energy Storage Targets across 50 U.S. States, with state-by-state policy progress, key resources, and model rules.

# State Grid Energy Storage System Standards and Specifications

This document offers a curated overview of the relevant codes and standards (C+S) governing the safe deployment of utility-scale battery energy storage systems in the United States.
