Explore key U.S. solar policy changes from May 2024, including state-level reforms, federal shifts, and trade updates impacting the industry.

In addition to legislative risks, recent federal actions have introduced new tariffs that significantly impact solar photovoltaic (PV) systems and energy storage components.

The report says many existing power plants that are being shut down can be converted to useful energy storage facilities by replacing their fossil fuel boilers with thermal storage and new ...

BLM has also announced new efforts to amend resource management plans and update its Programmatic Environmental Impact Statement for solar energy in the West. According to BLM, ...

DOE is simplifying the environmental review process for certain energy storage systems such as battery systems, transmission line upgrades, and solar photovoltaic systems.

Solar energy technologies and power plants do not produce air pollution or greenhouse gases when operating. Using solar energy can have a positive, indirect effect on the environment ...

The paper emphasizes the importance of widespread strategy frameworks that not only encourage solar adoption but also discusses broader energy system dependencies. This study ...

SEIA is engaged with policymakers at the regulatory and legislative levels in Washington, D.C. and across the country to establish supportive policy frameworks that allow solar to compete in the ...

Even as the Trump administration rolled out a series of anti-clean energy policies, solar and storage still accounted for 82% of all new power added to the grid in its first six months.

The latest policy on photovoltaic energy storage and environmental protection

This page describes the patchwork of federal, state, and local policies and regulations pertaining to renewable energy systems that impact project development.

Solar energy technologies and power plants do not produce air pollution or greenhouse gases when operating. Using solar energy can have a positive, indirect effect on the environment when solar ...
